

METALS

The naturally elegant luster of metals brings trend-forward sophistication to streamlined styles, ushering edge, interest and warmth to any space it graces.

Care for Your Metal Surfaces

- > Address spills immediately by wiping with a dry, soft cloth.
- > Dust regularly with a soft, damp cloth, followed by a dry one.
- > Avoid use of cleaning products with acid, vinegar, lemon, and ammonia, as abrasive ingredients can damage surface.
- > Metal surfaces are not scratch or heat-resistant, and may scuff or stain without proper care. To maintain material's natural appearance, avoid sharp objects on surfaces. Use coasters, trivets and placemats for protection against hot or wet items.
